

# THE NEW ENERGY SAVER RANGE

## WHY UPGRADE ?

Recover your investment in less than 3 years with just 20 hours of use per week!

**Reduce your energy bill by at least 50%!**

The more you use it, the more cost-effective it becomes. Achieve significant savings in money and energy, even during periods of high inflation!

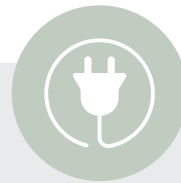

KITS - TC5 - TC7 - TS7 ENERGY SAVER

With Secabo Energy Saver presses  
**save up to 60% on energy!**

### A TECHNOLOGICAL REVOLUTION, EMBRACE SUSTAINABILITY AND EFFICIENCY IN YOUR BUSINESS

At the core of this revolutionary advancement is the Energy Saver HP5 heating plate, equipped with extra insulation. This innovation drastically cuts energy consumption in standby mode. Furthermore, the specially designed cover not only ensures safety and burn protection but also leads to additional energy savings.

### ALREADY OWN AN HP5 OR HP7 PLATE?

Our upgrade kits allow for easy installation of new covers on your existing heating plates, enabling you to benefit from energy savings. Achieve up to 35% energy savings with these upgrades.

**Achieve up to 35% energy savings with these upgrades. Welcome to the future of energy-efficient transfers !**
